DETAILED ACTION

1. Claims 1-7 have been canceled previously. Claims 9-10 and amended claim 8 (Paper No. 7, 4/1/03), are under consideration.
2. Receipt of applicant's arguments and amendments filed in Paper No. 7 (4/1/03) is acknowledged.
3. The following previous rejections and objections are withdrawn in light of applicants amendments filed in Paper No. 7, 4/1/03:
 - (i) the rejection of claim 10 under 35 U.S.C. § 112, first paragraph.
4. Applicant's arguments filed in Paper No. 4 (4/1/03), have been fully considered but were persuasive in part. The issues remaining and new issues, are stated below.
5. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

6. Claims 8-9 are rejected under 35 U.S.C. 102(a) as being anticipated by Goto et al. (1992) in light of WO98/35698.

This rejection is maintained for reasons of record set forth at pages 4-5 of the previous Office action (Paper No. 5, 10/1/02).

Applicants argue that the Goto et al reference does not teach about specific amino acid sequences and the pre-B cell growth-supporting ability thereof and therefore fails to describe the claimed antibody. However, contrary to Applicants' arguments, the instant protein of SEQ ID

Art Unit: 1646

NO:1 is indistinguishable from the prior art protein. A copy of the comparison of SEQ ID NO:1 (SEQUENCE COMPARISON 'A') of the protein of the instant invention to which the claimed antibodies are drawn, and the amino acid sequence of the protein in the reference to which the antibody MoAb HM1.24 is drawn, has been enclosed at the end of the last office action (Paper No. 5, 10/1/02). WO98/35698 reference is being relied upon because it teaches the amino acid sequence of HM1.24 protein (see SEQ ID NO:1, pages 44-45), the amino acid sequence being an inherent characteristic of the protein. The combination of the Goto et al and WO98/35698 reference show that the monoclonal antibody HM1.24 disclosed against a specific protein in the Goto et al reference, anticipates the instant claims, because the HM1.24 protein is 100% identical to the instant protein of SEQ ID NO:1 as disclosed by the WO98/35698 reference.

Where the Patent Office has reason to believe that a functional limitation, i.e. pre-B cell growth-supporting ability, asserted to be critical for establishing novelty in the claimed subject matter may be an inherent characteristic of the prior art, it has the authority to require the applicant to prove that the subject matter shown in the prior art does not possess the characteristics relied on. In re Schreiber, 44 USPQ2d 1429 (Fed. Cir. 1997).

Products of identical chemical composition cannot have mutually exclusive properties. A chemical composition and its properties are inseparable. Therefore, if the prior art teaches the identical chemical structure, the properties applicant discloses and/or claims are necessarily identical chemical structure, the properties applicant discloses and/or claims are necessarily present. In re Spada 15 USPQ2d 1655, 1658 (Fed. Cir. 1990). See MPEP.. 2112.01.

Art Unit: 1646

"From the standpoint of patent law, a compound and all of its properties are inseparable; they are one and the same thing." see In re Papesch, 315 F. 2d 381, 391, 137 USPQ 43, 51 (CCPA 1963).

Therefore, since the protein in the reference appears to be consistent with the protein in the instant application, the claimed antibody to the polypeptide would be the same as the antibody to the polypeptide of the reference. Since the Office does not have the facilities for examining and comparing Applicants' antibody with the antibody of the prior art, the burden is upon the applicants to show the novel difference between the protein of the instant application and that of the Goto et al reference.

Conclusion

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however,

Art Unit: 1646

will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
